On-the Job Training Office

ANNEX A

INTERNSHIP TRAINING PLAN
Applicable to all departments

Name of Company	:	TP ICAP Philippines
Level	:	Intern / On the Job Trainee
Program/Specialization	:	Technology Department / AI Engineering
Training Schedule	:	11:00am – 8:00pm
Duration	:	320 Hrs.

GENERAL GUIDELINE FOR FULL FACE-TO-FACE INTERNSHIP

Full Face-to-Face internship is a work experience program where the intern gains experience while working physically at the job location. The interns are expected to apply the academic theories and work values acquired from the academe to their selected industries. In this setup, the interns were exposed to the actual work environment. The assigned work activities are to be conducted onsite.

STUDENT OUTCOMES

Through the full face-to-face internship, students will gain the following outcomes:

- Critical thinking & problem solving
- Collaboration & teamwork
- Professionalism & strong work ethic
- Oral & written communication

TRAINING PLAN

The following is an initial training plan which filled out host company upon the signing of MOA and agreed by university.

Assignment topic:

Task	Expected Hours	Output / Deliverables	Learning Outcome
AI Task Automation Project			
1. Company Orientation, Tooling Setup, Environment Configuration and Secure Credentials Handling	6	Working Dev Environment, Repo Access Configured	Corporate Dev Workflow, Version Control, Secure Credential Building
2. Study ServiceNow data Model and Internal IT Operations	6	Notes on ServiceNow table structures and reference fields.	ITSM Concepts; How enterprise ticketing data is structured.
3. Build the ServiceNow data extractor, retrying Rest pull into CSV, fix bugs	20	Extractor.py, Config.py, Extracted Data Sets	API Integration, pagination, retry logic, defensive configuration design.

4. Develop the Analyzer Dataset summaries, top task/assignment groups, automation opportunity scoring, resolution text mining from close notes and work notes	18	Analyzr.py, Top Automation Opportunities and Duck DB Store	Data Analysis, text mining, identifying automation candidates from real data.
5. Build the Dashboard to visualize automation candidates.	8	Dashboard	Data Visualization and rapid dashboard prototyping.
6. Design System 2 – Unviersal Execution Engine, procedure Scheme and matcher run book.	22	Resource Engine and Schema	Rules-Engine Design, Domain modeling and safe Simulation.
7. Task Overlay and Step Level chunk Approval, SQLite Persistence, Appended-Only and FAST-API backend and thin web client	30	Domain.py, risks.py, web UI and control checks pass.	Clean Architecture, security design and approval authorization Models
8. Phase 2 – Unloadable Projects and read only feedback loop with reference field Flattering system	12	Live API Checks Pass	Parsing, Integration and Defense Normalization
TOTAL	**122**		
AI Virtual Assistant Project			
1. Build the escalation scoring engine with 4 weighted signals	18	Escalation Scoring Engine	Feature Engineering, weighted scoring, test-driven development
2. Develop Flow/ Mail Frequency analysis and finance ops signal pack	14	Core Flow.py and Interpreter.py	Signal Design, time series and NLP heuristics.
3. Implement Per Team Customization keywords, VIP senders and SLA by category thresholds and weights routing	12	Escalation Ext. Train Models and Text scripts Products	Configured Rule Systems, Multi-tenant Design.
4. Train and evaluate the ML escalation model data set preparation, training, rules and ML Blending benchmarking	20	Training Reports, Trained Models	Supervised ML workflow and evaluation matrix, Model and Rules Blending
5. Build Mailbox connectors and device code sign-in UI	10	Connect to messaging software, Live Connectors	OAuth/device code auth. IMAP and Graph API
6. Develop the React dashboard	6	Dashboard	Front End Development API Driven UIs.
TOTAL	**80**		
Business Intelligence System			
1. IDF + Means Clustering, SLA – Risk scoring System and Change Relationship Model	**22**	SLA Risk scoring Engine and repeat detection model	Feature Engineering
2. Author AWS Infrastructure as code and develop system Architecture, deploy Lambda Extractor, Glue ETL, Redshift and Event Bridge schedule	16	Infrastructure Stack	Cloud IAC, Data Lake Architecture, Schedule Pipelines
3. Generate executive Insights & reports via Amazon Bedrock; FAST API and React Reporting UI	10	Report Generators and Front End, summary reports	LLM Integration, Prompt Design and API+UI reporting
TOTAL	**74**

On-the Job Training Office

Pre-Send Email Checker			
1. Build the Detection Rules as pure testable typescript	14	Rule Engine	Type Script, Pure-Function Design, Regex Detection, Testability
2. Implement the Office.js integration on message send smart alerts, attachment extraction and mode mapping	10	Office Bridge, Attachment Parser	Office Add-in APIs, Event Driven programming performance
3. Externalize rules to configuration, write unit test and harness dependency verification	6	Rules Assertions Passing	Configure Driven Design, Testing under network constraints.
4. Document Deployment and Installation	4	Deployment	Add-in Deployment and Technical Documentation
5. Write and maintain automated tests across projects and Keep CI green	5	Test Suites	Test Automation, CI Disciplines, regression prevention
6. Author Technical documentation, progress reports; participate in code/semantic reviews	5	PR Reviews, Documentations	Technical Writing, Peer Review, Communication
TOTAL	**44**		
TOTAL RENDERED HOURS	**320**
